MongoDB

Installation

1. Install MongoDB via the script `sh bootstrap.sh`
2. Run `npm install`
3. Make sure Mongod is running. This can be tested by `systemctl status mongod`
   - if not start mongo by `systemctl start mongod`

Execution

Simply run `node server.js` and the Rest-API is available at port 8543. API doc can be found in the server.js file.
